

SEE-THRU VACUUM FILTERS

INLET FILTERS

- Positive O-ring seal system
- Vacuum rating to 0.5 Torr
- Capacity rating to 520 CFM
- Comes in 1" to 4" sizes
- Various filter media available
- NON rusting material construction

40-520 CFM

U.S. Vacuum SEE-THRU VACUUM INLET FILTERS are straight thru vacuum filters made to protect vacuum pumps from damaging particulate matter. Filters utilizes a paper, polyester or cleanable stainless steel mesh media to capture contaminates. Excellent choice for food processing, wood working and other applications where a Visible and cleanable (w/ wire mesh element) filter is required.

Filters comes with vacuum gauge port on top of the assembly for installation of a vacuum gauge.
